

PERSONA: Joan Perez

USER STORY/SCENARIO:

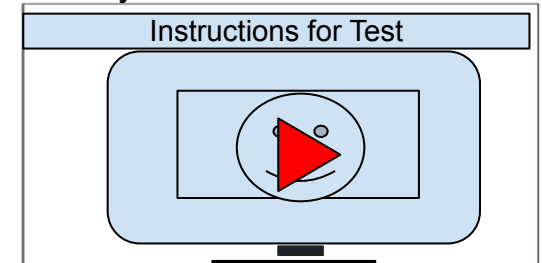

School Art teacher who has no way of testing for students with color disability

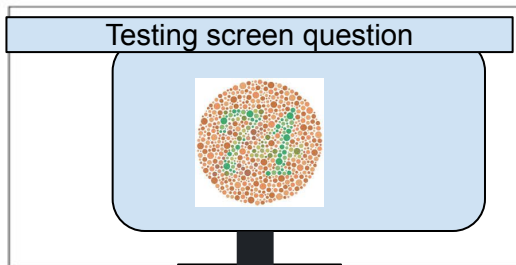

I need to test the students for who are not good with colors for color blindness

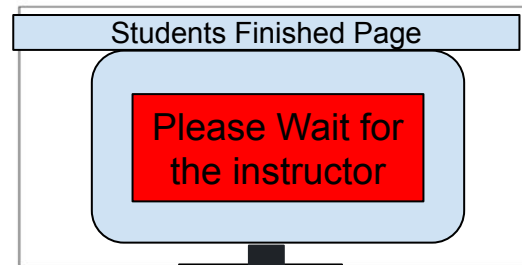

- Student logs into the test using the login provided from teacher

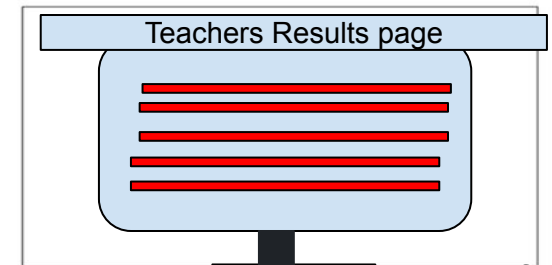

Student will watch a instruction video to know how the test works

Student will be prompted various question and asked for answers from the student

Student finished his test, and is given a waiting screen. Informing to wait for Teacher

Teacher will receive results of students test scores, and addition feedback and relay the scores
